Bachelor of Science, Web and Information Systems, New Jersey Institute of Technology

GPA: 3.38/4.0

Expected Graduation Date: May 2016

WORK EXPERIENCE

User Experience Developer Intern, IBM

May 2015 - Present / Poughkeepsie, NY

Designed mock-ups and prototypes with Axure RP for the new work-flow editor feature for a program that runs on the IBM Enterprise systems, and implemented by programmers for a web based interface.

Designed a completely new user interface that will enable high end enterprise IBM customers to build new Cloud systems.

Partnered with an IBM client facing group to perform heuristic reviews on current website design, forms, and web flow.

Taught application developers how and where to implement IBM Design Thinking for new internal mobile app, which will be used by IBM technical sellers.

User Experience Designer Co-op, UPS

Aug 2014 - Feb 2015 / Mahwah, NJ

Sketched, designed, and created hi-fidelity prototypes of a new design for the company's Provisioning Request System to be used by managers to input new hire information.

Learned about RACF security settings , guidelines, and the company's design standards in order to successfully design wire frames and prototypes for main project assignment.

Researched and documented a UX Protocol to be shared via SharePoint and to be practiced by the company's UX/UI Designers.

Assisted the web development team by modeling page specs per prototype screen, documenting UPS UI standards.

IT Helpdesk/Technical Support Co-op, AT&T

Jan 2014- Aug 2014 / Piscataway, NJ

Worked with service managers and vendor teams to promptly resolve circuit issues for AT&T Business customers in a quick-paced environment.

Learned configuration protocol of TCP/IP settings on network and troubleshooting TCP/IP, remotely accessing Client's routers and recording circuit activity via AT&T tools.

PROFESSIONAL AFFILIATIONS

Society of Women Engineers, Webmaster

Sept 2012 - January 2015 / Newark, NJ

Designed and maintained website (clubs.njit.edu/swe), successfully driving more than 100 website visits per day after implementation of responsive design, leading to higher club awareness on campus and an increase in new memberships.
